

Every day in this country more than 16,000 unwanted animals are killed in public shelters.

That's one every 6.5 seconds.

More than 1,000 of them are killed right here in our county every week.

The most important thing anyone can do about this atrocity is to spay and neuter your pets.

Then help someone else that you know to do the same.

Low-Cost Spay/Neuter and Vaccination Options

One unaltered cat and her offspring can produce up to 420,000 cats in just seven years!

Feral cats are not adoptable. If taken to one of the open access shelters, they will be destroyed. Removing them from their territory will cause the homeless cat population in that area to increase exponentially over time.

Please help to gradually reduce the population through TNR. Visit ALF.Petfinder.com to learn more about feral cats, then make an appointment with one of these clinics.

** Be sure to inquire about pricing and services when your appointment is made. Individual policies apply.*
