

**SPAY
ONE
STRAY™**

One unaltered cat and her offspring can produce up to 420,000 cats in just seven years!¹

¹ Estimate from The Humane Society of the United States (HSUS)

If everyone reading this would save **JUST ONE** cat this year and get that cat sterilized, imagine how **HUGE** the impact would be. While we'd be thrilled to have many people pledging to save one more life this year, we know that **JUST ONE PERSON** can make a world of difference.

You can be the one to make a **HUGE** difference for your neighbors and for the cats. Just save one...
JUST ONE
...and have it spayed. You don't have to make it a life-long commitment.

Did you know that:

If you stop feeding feral cats, they won't simply go away.²

FeLV and FIV are not the #1 killers of cats.²

More cats are intentionally killed in the United States than die from any other documented cause.²

Feral cats are not the cause of wildlife depletion.²

Feral cats are just as healthy as owned cats.²

Feral cats should not be taken to local shelters.²

70-73% of all cats entering animal shelters are killed.²

There is a solution

Trap, neuter, and return (TNR) lowers cat populations.²

Trap and remove doesn't work.²

Trap-Neuter-Return does work.²

Spaying and neutering prevents the spread of viruses in all cats.²

In communities not practicing TNR, more than 30 years of killing cats has done nothing to reduce feral cat populations.²

TNR is the solution.

Please make it your personal mission to spay just one cat. Save **ONE** life, and prevent that cat from breeding.

JUST SAVE ONE.
