

**SPAY  
ONE  
STRAY™**

**One unaltered cat and her offspring can produce up to 420,000 cats in just seven years!<sup>1</sup>**

<sup>1</sup> Estimate from The Humane Society of the United States (HSUS)

If everyone reading this would save **JUST ONE** cat this year and get that cat sterilized, imagine how **HUGE** the impact would be. While we'd be thrilled to have many people pledging to save one more life this year, we know that **JUST ONE PERSON** can make a world of difference.

You can be the one to make a **HUGE** difference for your neighbors and for the cats. Just save one...  
**JUST ONE**  
...and have it spayed. You don't have to make it a life-long commitment.

***Did you know that:***

**If you stop feeding feral cats, they won't simply go away.<sup>2</sup>**

**FeLV and FIV are not the #1 killers of cats.<sup>2</sup>**

**More cats are intentionally killed in the United States than die from any other documented cause.<sup>2</sup>**

**Feral cats are not the cause of wildlife depletion.<sup>2</sup>**

**Feral cats are just as healthy as owned cats.<sup>2</sup>**

**Feral cats should not be taken to local shelters.<sup>2</sup>**

**70-73% of all cats entering animal shelters are killed.<sup>2</sup>**

***There is a solution***

**Trap, neuter, and return (TNR) lowers cat populations.<sup>2</sup>**

**Trap and remove doesn't work.<sup>2</sup>**

**Trap-Neuter-Return does work.<sup>2</sup>**

**Spaying and neutering prevents the spread of viruses in all cats.<sup>2</sup>**

**In communities not practicing TNR, more than 30 years of killing cats has done nothing to reduce feral cat populations.<sup>2</sup>**

***TNR is the solution.***
