

Go **GREEN** and Save Lives

Some beautiful cats are living at the dump, reproducing like rabbits! We have a trapper committed to getting them all spayed, and a caretaker who will provide nutritional food. All we need is **\$600** for the initial sterilization costs.

Instead of tossing your items in the trash or recycle bin, consider cashing them in, or selling them, and then donating the proceeds to ALF's Landfill Cats fund. It's a **win-win!**

You won't be filling the dump with yet more STUFF, and you'll aid the poor animals who have been discarded there as though they were trash. As a bonus, you're helping to clean up our environment and making a "**green**" statement that also benefits homeless animals!

Animal Loving Friends is in need of funds for **three very critical needs**. With your help, we can:

- provide TNR to the Landfill cats who are reproducing at an alarming rate! **\$600**
- seek advanced treatment to improve the quality of life for our paraplegic cat, Willow **\$1200**
- construct an air-conditioned "cat house" to save some tame, yet homeless, pets who are barely surviving this excessive heat **\$400**
